

# EXPERIENCE MATTERS.

 **ISO 9001:2015**  
Certified by Intertek

 **CMMIDEV/3**  
CMMI DEV V2.0 / Eup. 202504-17 / Approved #19858

Mobomo builds elegant solutions to solve complex problems. We do it fast, and we do it at scale. As a premier provider of mobile, web, and cloud applications to federal agencies and large enterprises, Mobomo combines leading-edge technology with human-centered design and strategy to craft next-generation digital experiences.

## OUR SERVICES.

-  **DIGITAL TRANSFORMATION.**  
Fearlessly redefining digital landscapes for clients.
-  **HUMAN-CENTERED DESIGN.**  
Designing for users first from rebrand to redesigning products.
-  **DEVSECOPS.**  
Leveraging automation to deploy cost-effective and secure solutions.
-  **DRUPAL.**  
Designing and developing within the open-source CMS community - A core competency at Mobomo.
-  **MOBILE APPLICATION DEVELOPMENT.**  
Developing and designing world-class apps for over a decade.
-  **24/7 CALL CENTER.**  
Supporting and prioritizing customer service tickets.
-  **PROJECT STAFFING.**  
Finding and researching the perfect candidate for any project.

# THINK BIG.

For as long as we can remember, we've defied expectations and embraced the insurmountable, and we're still just getting warmed up. Our clients can expect this drive through all of the services we provide.

## DIGITAL TRANSFORMATIONS

When it comes to content-rich and innovative digital platforms, Mobomo fearlessly redefines the landscape.

## HUMAN-CENTERED DESIGN

We approach every product with users in mind before we even think about visual design. Every solution we build is for people. From a rebrand, to redesigning an existing product or service, or market research and analysis, strategy alignment, or any combination in-between, Mobomo is here to customize a solution for you.

## DEVSECOPS

DevSecOps is a key Mobomo service that delivers success in not only designing and deploying award-winning solutions, but also ensuring the system is deployed in a manner that leverages automation to reduce the cost of operations and maintenance. Mobomo embodies a culture that focuses on shipping products quickly and efficiently.

## DRUPAL

Mobomo's Drupal development experience is one of our core competencies. Our team members vary, from developers to designers to project managers – they have many years of Drupal experience and Drupal projects behind them to work with you on creating a unique, cost-effective, sustainable product.

## MOBILE APPLICATION DEVELOPMENT

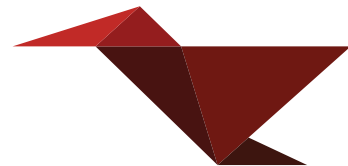

Mobomo has over a decade of experience designing, building, delivering, and supporting world-class mobile applications using our award-winning Agile engineering principles. This enables us to ship over 50 apps each year to the Apple and Google app stores.

## 24/7 CALL CENTER

From early mornings to late evenings, our support team is on call to manage any and all requests providing our clients with peace of mind. We understand that things can go wrong and customers can need support at any time of day.

## PROJECT STAFFING

Talent is everything - our Mobomo staffing services will help to find the perfect candidate for any project or workstream. Whether you're looking for full-time or part-time help, we have certified experts on every subject-matter.

# OUR PROVEN PROCESS.

## INNOVATIVE MOBOMO PROCESS AND COLLABORATIVE TEAMWORK

At Mobomo, we understand the importance of a strong process. The process ensures that we manage deliverables on time and on budget. With over a decade of experience, we've developed award-winning methodology we call **IMPACT™**: Innovative Mobomo Process and Collaborative Teamwork. This rigorous methodology creates the foundation for our technical and managerial approach to every project and task.

**Why IMPACT™?** IMPACT™ is Mobomo's proven, adaptable, nimble Scaled Agile Framework (SAFe) governance process that enables the below in order to provide efficiency in how we support our client's projects:

- Scalability in staff and agile teams.
- Alignment of cross-functional teams to merge programs, teams, and product management processes to serve multiple programs in a cost-effective manner.
- Continuous value improvement through data-driven quality measurement.
- Flexibility to accommodate ad hoc and emergency requests.
- Introduction and integration of emerging technologies into all project teams.

## THE CORE COMPONENTS:

### AGILE METHODOLOGY

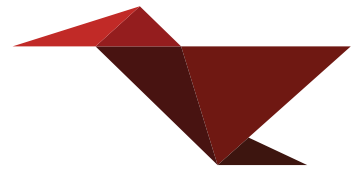

Each **IMPACT™** Team follows Mobomo's standard CMMI Dev Level 3 / ISO 9001:2015 Agile Software Development Methodology for all of their products.

### USER-CENTERED DESIGN PROCESS

User-centered design (UCD) is a vital part of the **IMPACT™** iterative product development process. **IMPACT** creates opportunities for delivery teams to learn from users and stakeholders in each phase of our UCD process.

### DEVSECOPS

Finally, DevSecOps is key to **IMPACT™**'s success in designing and deploying award-winning solutions. An everything-as-code culture promotes a process that is documented, version controlled, and can be deployed or rolled back at any moment.

# OUR WORK.

## NASA

Mobomo has architected the [www.NASA.gov](http://www.NASA.gov) Drupal AWS cloud environment with security, performance, and availability in mind.

## NOAA

Focusing on improving content efficiency, design consistency we launched the framework for NOAA's next generation site.

## FERC

In April 2020 Mobomo launched the redesigned site and helped implement FERC's first sitewide content management system.

## MBN

Leveraged the "Voltron" content management system (CMS) we created for VOA to migrate, redesign and deploy MBN's 5 websites.

## PULSE

Pulse was looking to develop a dashboard that would connect providers to patients. We created an app from the ground up.

## PRAC

Mobomo redesigned, developed and deployed a new website for the Pandemic Response Accountability Committee (PRAC) built using a Drupal content management system (CMS). cloud.

## VOA

For VOA, Mobomo built Voltron, a mission-critical (45+) multi-language content management system. Mobomo developed a user centric, responsive design that provides a simple, intuitive interface and consistent user experience across multiple websites.

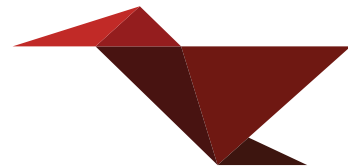

## ITA

Mobomo built the existing ITA infrastructure, moving virtually all services out of a physical data center into Amazon Web Services and Office365, making ITA one of the most cloud enabled agencies in the Federal space.

## VA

For the Department of Veterans Affairs, Mobomo created the responsive web application, Mental Health Checkup (MHC). Utilizing an ecosystem of microservices, MHC was built using modern javascript frameworks and a Java Spring based REST API, all hosted in a highly-available, scalable, Kubernetes cluster running in the cloud.

# INNOVATION LABS.

Mobomo Labs is dedicated to the research and development of new and emerging technologies, with a focus on contributing to open source projects and extensions. We're always looking for ways to give back to the projects that we use in our daily work, and come up with innovative solutions to the problems we face during development. Here are a few of our current projects:

## AI & MACHINE LEARNING

Using Robotics Process Automation to support the client processing handwritten Health Care Forms.

## VOICE ENABLED TOOLS

With a prototype under review to support USGS use of Alexa to track earthquake impact, Mobomo is embracing the Internet of Things (IoT) as a new forum for innovation.

## VIRTUAL & AUGMENTED REALITY

Mobomo has used drone-captured 3D renderings to create VR/AR first person shooter training applications to safely educate security teams.

## BLOCKCHAIN

Leading the conversation in the industry to support process improvements to track data when and where the government may need it.
